

PINOT NOIR

Unlike its white counterpart, Chardonnay, the great red grape of Burgundy had a difficult time coming to prominence as one of the great varietals in the United States. In recent years winemakers have perfected their craft, movie-goers saw this varietal in a different light, and now Pinot Noir has quickly become the Cinderella story. While some styles are light in body and color, others are more concentrated and lively with full body and plenty of complexity. The red berry and cherry flavors work great with our lighter meats and grilled fish. If you haven't experienced this wine, try the Melville to get a glimpse of its real appeal.
